

# Jane Doe (fictional sample)

San Jose, CA • jane.doe@example.com • linkedin.com/in/example-janedoe • github.com/example-janedoe

*Applied AI / LLM Engineer*

## Experience

---

### Northwind Labs

San Jose, CA

*Machine Learning Intern*

Jun 2025 - Sep 2025

- Built an LLM eval harness (pytest plus a rubric-graded judge) over 300+ prompts; cut manual review time about 60 percent.
- Shipped a retrieval-augmented support bot (FastAPI plus pgvector) that deflected about 25 percent of tier-1 tickets in an A/B test.

### State University AI Lab

Anytown, USA

*Undergraduate Researcher*

Jan 2025 - Present

- Trained and evaluated transformer classifiers on a 40k-example dataset; +7 F1 over a TF-IDF baseline.
- Ran ablations with bootstrapped confidence intervals; co-authoring a workshop paper (under review).

## Projects

---

### agent-bench

github.com/example-janedoe/agent-bench

- Open-source harness that runs multi-step tool-use agents and scores them by pairwise LLM judging; 200+ stars.

## Skills

---

**AI/ML:** PyTorch, LLM evals, RAG, prompt engineering, agentic tool-use, scikit-learn

**Languages:** Python, SQL, TypeScript

**Tools:** Docker, FastAPI, Postgres/pgvector, AWS (S3, EC2), Git

## Education

---

### State University

Expected May 2026

B.S. in Computer Science

Anytown, USA
